

SHUBHAM PURI

(347) 280-4249 | spur245@gmail.com | [Portfolio](#) | [LinkedIn](#) | [GitHub](#)

EDUCATION

New York Institute of Technology, Manhattan, NY,

May 2026

B.S. in Computer Science

Honors: Cum Laude, Dean's List, Presidential HonorList

Courses: Data Structures, Design & Algorithms, Software Engineering, Artificial Intelligence, Computer Networks, System Design, Database

SKILLS

Languages: Python, JavaScript, TypeScript, SQL

Frameworks/Libraries: React, React Native, Node.js, FastAPI, LangGraph

Database: PostgreSQL, Supabase, Firebase

Tools & Platforms: Docker, Git, GitHub, Vercel, CI/CD, Figma

PROJECTS

CS Career Navigator - Personalized Career Path Tool

[Demo](#)

Python, FastAPI, Supabase, REST API, Gemini API

- Identified career mentorship gap across 20+ CS students; built and deployed an AI-powered assessment to 21+ active users, achieving strong user retention
- Built and iterated on a personalized career recommendation engine, improving suggestion relevance by 40% and helping users identify potential career paths in a single session

AI-Powered Malware Detection App

[Demo](#)

React Native, TensorFlow Lite, Firebase, Python

- Built a mobile app that scans Android apps for malware directly on-device using a neural network, requiring no internet connection and keeping all user data private
- Designed a cloud-based pipeline to push model updates remotely without requiring users to download an app update, ensuring accuracy against new threats

Salon Booking Platform - Production Web App

[Demo](#)

TypeScript, Node.js, Supabase, PostgreSQL, REST API, Vercel

- Built a full-stack booking platform from scratch, deployed to production, and actively used by a real salon business
- Gathered requirements directly from the salon owner to design and implement core flows for appointments, service browsing, and admin management; applied OOP design patterns to deliver a scalable, maintainable codebase

Agon- Fitness APP

Expo, FastAPI, Prompt Engineering, PostgreSQL, Groq, RevenueCat

- Shipped a React Native app to 12+ beta testers, and used their feedback to prioritize and ship improvements.
- Built offline workout and meal logging that saves on the phone and syncs to the cloud, so users never lose data without signal.
- Added an AI meal scanner that turns a photo of food into an itemized nutrition breakdown, with a confirm & edit step so users approve the results before anything is saved.
- Designed engagement and monetization loop such as XP, quests, and a personalized avatar that visually evolves with training, plus unlockable cosmetics gated behind subscription and purchases

WORK EXPERIENCE

Dreamerix - Software Engineering Intern

New York, NY (Hybrid) | February 2026 – April 2026

- Built and maintained RESTful API endpoints using Node.js/Express and Python, supporting user enrollment and authentication, course progress tracking, and certification workflows for 100+ active learners.
- Designed PostgreSQL schemas and optimized database queries in a pair-programming workflow with a senior engineer, shipping backend features across bi-weekly Agile sprints.
- Developed React components consuming REST APIs to display real-time learner data, bridging frontend and backend across full-stack feature delivery.

Queens Library - Tech Mentor

Queens, NY | May 2025 - Present

- Led STEM workshops in web dev, Arduino, 3D printing, and Lego robotics for 15+ teens; taught Python for hardware programming and introduced AI tools and concepts.
- Designed a 6-week web development curriculum where students completed independent projects.

Outlier - AI Quality Analyst

Remote | Oct 2024 - Feb 2025

- Designed 25+ adversarial and edge-case prompts across code generation, reasoning, and factual accuracy tasks using Agile sprint-based evaluation cycles, contributing to a **20% improvement** in model accuracy.

Mouse Squad - Tech Support

Brooklyn, NY | Sep 2023 - April 2024

- Diagnosed hardware and software issues across a multi-device environment, reducing system downtime by **30%**; managed SQL-logged inventory for 50+ devices, ensuring uninterrupted staff access.

HACKATHONS & COMPETITIONS

Nepali Hackathon

March 2026 | Team

- Built a mental health web app for stigma-free early detection and peer support; Top 4 of 83 teams

NYIT Hackathon

Manhattan 2024 | Solo

- Built a real-time facial recognition system using Python and OpenCV; extended into an automated attendance pipeline with identity verification.
